

Is your message reaching those in the community looking for guidance who are not part of your congregation?

There is an easy way to expand your ministry, spread the gospel and promote your church community.

And it's MORE AFFORDABLE THAN YOU MIGHT THINK...

Dear [PROSPECT]:

As you know the Internet has become a powerful presence in our daily lives. It is a great source of information which is why it is so important for churches to create an online presence with a website. Thousands of people go online each day searching for information. A church website is a necessity. It allows you to expand your ministry to a wider audience, reaching those within your community searching for more meaning in their lives.

A professional church website will help your church continue to grow and keep your community informed

A church website should do more than just provide information; it should also focus on building and strengthening the relationship with current and prospective members of your congregation. Superior Design Enterprises provides complete website development and maintenance for a variety of Metro Atlanta businesses and organizations. Our local experts are available to help you select the best design for your website, and develop it to fit your specific needs.

We use high-quality, professional templates to create a unique web design. We will develop a website design that complements your ministry. It will include basic information, and any extra website features which include:

- Automated monthly church news letter
- Online calendar of events
- Automated daily devotionals
- Important announcements
- Access to sermons on audio file
- Email blasts to members
- Online member directory
- True life testimonials of current members
- And more!

You get what you ask for guaranteed!

Superior Design Enterprises provides experienced, reliable service you can count on. We also provide continued maintenance and support every step of the way. If issues arise, you can contact our support team 24/7 and we will resolve the problem immediately.

Take the first step toward a new website design today – your congregation will thank you for it!
